

**PARENT/GUARDIAN REQUEST FOR ADMINISTRATION OF MEDICATION
FOR ALLERGIC REACTIONS**

Student: _____ DOB: _____ School: _____

Schools must obtain specific written parental/guardian authorization before any medical treatment including medication administration can be provided. When signed by the parent/guardian this written informed consent gives trained school/Child Care Contractor (CCC) staff authorization to implement the medical order. When parents/guardians authorize a medical treatment for their child in school/School Age Child Care (SACC) such authorization includes permission for appropriate communications between the school health professional and the medical prescriber related to the specific treatment ordered. Health treatment plans not signed and dated by the parent/guardian will not be implemented until all signatures have been obtained. Legally appropriate school health professional-medical prescriber communications based on the medical orders generally include the following:

- The prescription of treatment itself (e.g., questions regarding dosage, method of administration, potential drug interactions);
- Implementation of the treatment in school (e.g., questions regarding safety concerns, infection control, issues, or modifications in the treatment order related to the school setting or student's academic schedule); and
- Student outcomes from the treatment (e.g., questions regarding observed side effects, possibly untoward reactions, observation of behavior in the classroom).

The student may not attend school until the written parental/guardian authorization has been signed and returned to the school.

In accordance with the Virginia Code § 22.1-274, I agree to the following:

I will not hold the School Board, any of its employees, or CCC liable for any negative outcome resulting from the self-administration of said emergency medication by the student.
